EXPERIENCE

Web Developer

neogCamp
January 2023-current

In my role at NeogCamp, I spent seven months as a ReactJS developer, building projects and refining expertise in team management, time management, and meeting project deadlines. I am now well-prepared for a ReactJS developer position, equipped with hands-on experience and a commitment to continuous learning.

PROJECTS

E-Commerce Website

As a React frontend developer, I designed and developed a dynamic e-commerce website for pets and pet products using React JS and modern React hooks for state management. Implemented responsive UI/UX, optimized performance, and ensured seamless user interactions. Leveraged my expertise in React, JavaScript, and front-end technologies to deliver an engaging and user-friendly online platform.
https://mycurlingtails.netlify.app/

Online Recipe site
Developed a dynamic food recipe website with user recipe submission and browsing functionality. Proficient in state management, component-driven development, and UI/UX optimization for seamless user experiences.
